

NetReward

NRT — The Global Data Economy Token

"Your Data. Your Rewards. Your Power."

WHITE PAPER · VERSION 2.0 · JUNE 2026

| Solana Blockchain

| Privacy-First Payment

| Real Utility Token

| AI & Gaming Ready

info@netreward.online | netreward.online

1. Abstract

Every second, billions of people consume internet data — streaming videos, browsing social media, using AI assistants, playing online games, and communicating through messaging apps. In every interaction, the user generates enormous economic value for service providers, advertisers, and network carriers, yet **the user receives nothing in return.**

NetReward fundamentally reverses this equation. It is a blockchain-powered data-rewards ecosystem that compensates internet users with **NRT (NetReward Token)** for their everyday data consumption. Built on the **Solana** blockchain for speed and cost-efficiency, NRT is not a speculative asset — it is a **core functional utility token** bridging the worlds of data, artificial intelligence, and decentralized finance.

\$1.8T

AI Market by 2030

\$200B

Gaming Industry

5 Billion+

Internet Users Worldwide

2–3×

Data Growth Every 2–3 Years

2. The Problem: A Broken Internet Economy

Challenge	Impact
n Data Poverty	In emerging economies, 1GB of mobile data can cost 5–10% of average daily income — trapping users in a "data poverty" cycle, unable to access education, financial services, or employment.
n Wasted Marketing Spend	Display ad click-through rates average 0.1%. Service providers spend billions on ads that don't convert. Customer acquisition costs (CAC) rise while ROAS continues to fall.
n Stagnating ISP Revenue	Telecom companies face brutal price competition. ARPU declines globally. ISPs are commodity providers with no relationship to the value created on their networks.
nn Digital Exclusion	Governments invest in digital infrastructure, but adoption is throttled by connectivity costs. The digital divide is an affordability problem, not just an infrastructure problem.

3. The NetReward Solution

NetReward creates a **self-sustaining economic loop** where every participant benefits — users earn, service providers acquire loyal customers, ISPs gain passive revenue, and governments collect taxes on a growing digital economy.

SERVICE PROVIDERS

Fund NRT campaigns to acquire & retain users

GENERAL USERS

Earn NRT for data usage (85% share)

t

S

NRT TOKEN

t

GOVERNMENTS

Tax revenue & digital economy data

S

INTERNET SERVICE PROVIDERS

5% passive cashback on every byte

Reward Distribution Formula

$$\text{NRT Earned} = (\text{Total Bytes} / 1 \text{ GB}) \times \text{Base Reward Rate} \times \text{NHS Multiplier} \times \text{Campaign Bonus}$$

Recipient	Share	Description
User	85%	Primary earner — distributed instantly to user wallet
Service Provider	10%	Infrastructure cashback — offsets SP campaign costs
Internet Service Provider	5%	Passive network cashback — automatic, no integration required

4. How It Works: The Complete Process Flow

4.1 User Journey

Step	Action	Detail
01	Download	Install the NetReward app (iOS/Android) or browser extension (Chrome/Edge).
02	Register	Sign up with email. Select your role: User, Service Provider, or ISP.
03	Browse Campaigns	Discover which services are offering NRT rewards for data consumption.
04	Join a Campaign	One tap to opt in. The NetReward SDK runs silently in the background.
05	Use the Internet Normally	Stream, shop, game, chat, or use AI. Watch NRT accumulate live.
06	Spend or Save	Withdraw as fiat, pay subscriptions, trade P2P, or hold for appreciation.

4.2 Service Provider Journey

- Register as SP and complete business KYC (logo, website, business registration).
- Register a service — provide app name, category, web domain, and webhook URL.
- Integrate the NetReward Tracker SDK (JavaScript/Android/iOS/Windows) — just 3 lines of code.
- Create a Campaign — define budget, target demographics, locations, dates, and reward rates.
- Fund the Campaign — deposit NRT into escrow. Campaign goes live when funded.
- Receive 10% cashback automatically for every NRT distributed to users via your campaign.
- Monitor real-time analytics — users reached, NRT distributed, session lengths, and ROI.

4.3 ISP Journey

- Register as ISP and complete KYC (ISP license, business registration).
- Register your network — provide ASN, IP ranges (CIDR), country, and network category.
- Verification — NetReward validates ASN ownership via BGP challenge-response and RIPE/ARIN.
- Passive Revenue — 5% of all NRT earned by users on your network is automatically credited to your wallet.

No SDK.

No integration. Fully automatic.

- Optionally create ISP campaigns to incentivize data subscriptions and network loyalty.

5. The NRT Token: Core Functional Utility

NRT is not a meme coin. NRT is not a governance-only token. NRT is a **core functional utility token** that powers real economic activity across the global data, AI, and crypto ecosystems.

Three Pillars of NRT

n Data Economy Token

NRT is the standardized unit of value for internet data. When a user consumes 1 GB on a sponsored platform, NRT is minted and distributed. Data becomes a liquid, tradable, measurable economic asset.

n AI Economy Token

Users earn NRT while using AI services (ChatGPT, Claude, Gemini, Midjourney), effectively subsidizing AI subscription costs. NRT bridges the gap between AI's value and users' ability to pay.

n Crypto Economy Token

Built on Solana Token-2022 with transfer hooks, metadata extensions, and confidential transfers. Tradable on DEXs (Raydium, Orca), CEXs, and a built-in P2P marketplace.

Core Functions of NRT

Function	Description
Earn	Passively earn NRT by consuming internet data on sponsored platforms — automatically, in real-time.
Spend	Pay for subscriptions, products, and services via Scan2Pay QR code payments.
Trade	Buy and sell NRT on the built-in P2P marketplace, DEXs (Raydium, Orca), and CEXs.
Send	Transfer NRT to anyone globally — instant Solana confirmation (~400ms), near-zero fees.
Withdraw	Convert NRT to local fiat currency (naira, dollars, cedis) via integrated payment gateways.
Subscribe	Set up recurring NRT payments for streaming, AI tools, SaaS, and gaming subscriptions.
Cross-Border Pay	Freelancers and startups receive international payments instantly, at 1–2% vs 8–15% traditional cost.

6. Why NRT Is Different From Every Other Token

Token Type	Value Source	NRT Advantage
Meme Coins (DOGE, SHIB)	Speculation & social hype	NRT backed by measurable data consumption — real bytes, real sessions.
Governance Tokens (UNI, AAVE)	Voting rights only	NRT is primarily a utility token for actual payments and rewards.
Stablecoins (USDT, USDC)	Pegged to depreciating fiat	NRT appreciates with ecosystem growth — not pegged, not stagnant.
Exchange Tokens (BNB)	Fee discounts on 1 exchange	NRT is accepted across thousands of SPs, ISPs, and a cross-border payment system.
Play-to-Earn (AXS, SAND)	Single gaming ecosystem	NRT rewards ALL internet activity — streaming, shopping, gaming, AI, education.

The NRT Value Formula

$$\text{NRT Price} = \text{Base Price} \times \text{Network Health Score Multiplier} \times (1 + \text{Volume Bonus})$$

NHS Component	Weight	Signal
Campaign Demand	30%	How much are Service Providers spending on NRT campaigns?
Trade Volume	25%	How actively is NRT being traded across all markets?
Data Consumption	20%	How many gigabytes are being consumed via sponsored sessions?
P2P Activity	15%	Volume and frequency of peer-to-peer NRT trades.
Investor Fund	10%	Treasury reserve health and institutional holdings.

7. Tokenomics & Investor Opportunity

7.1 Token Supply & Distribution

Allocation	Percentage	Vesting Schedule
User Rewards Pool	40%	Released dynamically based on real data consumption
Ecosystem Development	20%	4-year linear vesting
Team & Advisors	15%	1-year cliff + 3-year linear vesting
Early Investors (Seed/Private)	10%	6-month cliff + 2-year linear vesting
Liquidity Pool (DEX/CEX)	10%	Deployed at TGE for immediate liquidity
Treasury Reserve	5%	Multi-sig controlled (Squads Protocol), strategic use

7.2 Investor Growth Projections

Growth Phase	Est. NHS	Price Multiplier	Investor Return
Seed (Pre-launch)	10–20	0.8×–0.9×	Entry price
Phase 1 (10K users, 10 SPs)	30–40	1.0×–1.2×	1.3×–1.5× from seed
Phase 2 (100K users, 50 SPs, 10 ISPs)	50–60	1.2×–1.5×	2×–3× from seed
Phase 3 (1M users, 200 SPs, 50 ISPs)	70–80	1.8×–2.5×	5×–8× from seed
Phase 4 (10M users, Global)	85–95	3×–5×	10×–20× from seed

7.3 Revenue Model

Revenue Stream	Rate	Description
Campaign Fees	2–5%	Fee on campaign deposits when SPs fund NRT campaigns
Withdrawal Fees	1–3%	Fee on NRT ® fiat conversions via local payment partners
P2P Trading Fees	0.5%	Small fee on each peer-to-peer trade (buyer + seller)
Scan2Pay Fees	1.5%	Fee on merchant payment transactions via QR code
Premium Features	Flat fee	Priority support, advanced analytics, API rate increases
Treasury Yield	Variable	DeFi protocol yield on treasury reserves

8. NRT & The AI Economy

The artificial intelligence industry is projected to reach **\$1.8 trillion by 2030**. Yet AI access remains deeply unequal — a ChatGPT Plus subscription (\$20/month) represents several days of income for workers in many emerging markets. NRT changes this equation.

Feature	Description
Earn While You Use AI	When a user interacts with ChatGPT, Claude, Gemini, or Midjourney integrated with NetReward's Tracker SDK, every byte of data consumed during the AI session earns NRT.
Spend NRT on AI Subscriptions	Earned NRT can be used directly to pay for AI service subscriptions — effectively making AI tools free for heavy users in emerging markets.
Universal AI Payment Token	Instead of each platform having its own credit system, NRT serves as a unified AI purchasing token. Users buy NRT once and spend it across OpenAI, Anthropic, Stability AI, and others.
High-Value Sessions	AI services consume significant data — LLM responses, image generation, code completions. Users earn MORE NRT per AI session compared to basic browsing.

9. NRT & The Gaming Industry

The global gaming industry generates **\$200 billion annually**, yet a massive opportunity is being lost: hundreds of millions of gamers play offline or in low-bandwidth mode to avoid data costs — missing live events, multiplayer, and in-app purchases.

Feature	Description
Earn NRT While Playing Online	Every byte of multiplayer data, every stream, every download earns NRT — incentivizing online play over offline mode.
Spend NRT on In-Game Purchases	NRT can be spent on battle passes, skins, virtual items, and premium subscriptions within any integrated game.
10% Cashback for Game Developers	Game developers (as SPs) receive 10% of all NRT earned by their players, creating a new passive revenue stream.
Zero-Code Web Integration	HTML5/WebGL/React games need only a single script tag. The SDK automatically hooks into WebSockets, Fetch, and XHR to track bandwidth — no custom code required.
Revenue Impact	30–50% increase in in-app purchase opportunities, higher session lengths, and organic user acquisition driven by NRT rewards.

10. NRT as a Cross-Border Payment System

Payment Method	Speed	Fee	Access
Traditional Bank Wire	3–5 days	8–15%	Bank account required
PayPal / Wise	1–3 days	3–5%	Card/bank required
NRT on Solana	~400ms	1–2%	Mobile app only

Local Payment System Partnerships

Region	Partners	Methods
Nigeria	OPay, Paystack, Flutterwave	Bank transfer, debit card, USSD, mobile money
Ghana	Paystack, MTN MoMo	Mobile money, bank transfer
Kenya	M-Pesa, Flutterwave	Mobile money, bank transfer
South Africa	Paystack	Bank transfer, Instant EFT
Global	Stripe, Circle (USDC)	Credit/debit card, USDC stablecoin

11. Technology & Security Architecture

Layer	Technology	Purpose
Database	PostgreSQL (Supabase)	ACID-compliant financial ledger with Row-Level Security
Edge Functions	Deno (Supabase Edge)	Ultra-low latency telemetry ingestion, globally distributed
Blockchain	Solana (Token-2022)	On-chain NRT transfers, escrow, and transparent ledger
Real-Time	Supabase Realtime + WebSocket	Live earnings updates, price feeds, P2P notifications
Cache	Redis	Rate limiting, session deduplication, price caching
Storage	Supabase Storage	KYC documents, logos, and payment proofs
CDN	Cloudflare	DDoS protection, global edge caching, WAF

Security Architecture

Security Layer	Implementation
Telemetry Signing	Every bandwidth report is HMAC-SHA256 signed. Unsigned or tampered reports are rejected.
Device Fingerprinting	Hardware-level unique identifiers prevent Sybil attacks (fake accounts).
Anomaly Detection	Real-time flags on impossible speeds (e.g. 10 GB in 5 seconds) and volume spikes.
JWT Authentication	Short-lived access tokens (15 min) with rotating refresh tokens (7 days).
Biometric Auth	Face ID and fingerprint login on all mobile devices.
Multi-Sig Treasury	3-of-5 multi-signature wallet (Squads Protocol) for all treasury operations.
RLS Policies	Row-Level Security on all database tables — users can only access their own data.
Audit Logging	Every admin action, wallet mutation, and security event logged with full metadata.

12. Referral System & P2P Marketplace

Referral Tier	Requirement	Referrer Bonus	Referred Bonus
Bronze	1–10 referrals	5 NRT per referral	2 NRT welcome bonus
Silver	11–50 referrals	8 NRT per referral	3 NRT welcome bonus
Gold	51–200 referrals	12 NRT per referral	5 NRT welcome bonus
Platinum	200+ referrals	20 NRT per referral	10 NRT welcome bonus

Additionally, referrers earn a **2% ongoing commission** on their referrals' NRT earnings for the first 90 days.

P2P Marketplace Features

Feature	Description
Escrow Protection	When a trade is initiated, NRT is locked in escrow until both parties confirm payment — eliminating counterparty risk.
Payment Proof	Buyers upload proof of payment. Sellers verify and release NRT from escrow instantly.
Dispute Resolution	Built-in dispute system with real-time chat, evidence capture, and admin arbitration.
Reputation System	Post-trade ratings and reviews build verifiable seller trust scores over time.
Countdown Timers	15-minute payment windows prevent stalled or abandoned trades.
CEX Strategy	Regional exchanges (Quidax, Luno)® Mid-tier global (MEXC, KuCoin)® Tier-1 (Binance, Coinbase).

13. Government Benefits & Regulatory Compliance

NRT is designed to **benefit governments, not circumvent them**. Every NRT « fiat transaction creates a taxable event, and the platform enforces compliance at the infrastructure level.

Government Benefit	Mechanism
Tax Revenue	NRT « fiat conversions are taxable events. Country-specific rates are automatically applied, deducted, and reported.
Digital Economy Growth	NRT subsidizes internet access, accelerating adoption of e-governance, digital banking, and online education.
Financial Inclusion Data	Anonymous, aggregated platform data shows adoption rates, spending patterns, and economic activity by region.
AML/KYC Compliance	Tiered KYC with government ID verification, biometric liveness checks, and business registration validation.
OFAC/Sanctions Compliance	Geo-blocking for sanctioned jurisdictions. Full GDPR, CCPA, and local data protection law compliance.
Employment & Innovation	NRT creates economic opportunity for SP developers, ISP partners, P2P traders, and community managers.

14. Roadmap

Phase	Timeline	Milestones
Phase 1 — Foundation	COMPLETED	PWA dashboard, all role-based UIs (User/SP/ISP/Admin), P2P marketplace, Scan2Pay, KYC, wallet, support system.
Phase 2 — Core Backend	COMPLETED	Supabase schema (100+ migrations), Edge Function tracking, Reward Engine RPC, device management, transaction ledger.
Phase 3 — Mobile & Extensions	IN PROGRESS	React Native app (iOS/Android), Chrome/Edge extension, background tracking service.
Phase 4 — Token Launch	Q3 2026	Solana mainnet deployment, DEX liquidity (Raydium/Orca), initial SP/ISP onboarding.
Phase 5 — Growth	Q4 2026	10+ SP integrations, 5+ ISP partnerships, P2P marketplace live, CEX listings (regional).
Phase 6 — Scale	2027	50+ SPs, 10+ ISPs, AI service integrations, gaming studio partnerships, Tier-1 CEX listings.
Phase 7 — Global	2027–2028	Multi-continent expansion, government partnerships, enterprise API, cross-border payment adoption.

15. NetReward App: The Super App for the Data Economy

The NetReward app is not just a wallet. It is the **most accessed app for launching other apps** — a Super App that serves as the central hub for the entire data economy.

Platform	Technology	Experience
iOS & Android	React Native (Expo)	Full-featured native mobile app with biometric auth
Chrome & Edge Extensions	Manifest V3	Browser-based data tracking and wallet management
Progressive Web App	Vite + React 19	Full dashboard experience on any browser, any device
Desktop (macOS, Windows, Linux)	Electron	Full desktop experience with background tracking service

Cross-Platform Sync: One account. Every platform. All data, earnings, and settings sync instantly through the shared Supabase backend — earn on Chrome at work, check on mobile at lunch, withdraw on desktop at home.

1. Legal Disclaimer

This white paper is for informational purposes only and does not constitute financial, investment, legal, or tax advice. NRT tokens are utility tokens designed for use within the NetReward ecosystem. Token prices are determined by market forces and may fluctuate significantly. Past performance projections are estimates based on modeling and do not guarantee future results. Investors should conduct their own due diligence and consult qualified professionals before making investment decisions. NetReward complies with all applicable laws and regulations in the jurisdictions where it operates.
